

## Innovate the Future at the Hampton Hub Remake Learning Days 2018

***For Immediate Release: May 11, 2018***

The Hampton Township School District, known for its Tradition of Excellence and transformative learning environment, is pleased to announce its participation in the 2018 Remake Learning Days.

Hampton will host Innovate the Future at the Hampton Hub from 6 to 8 p.m. on Monday, May 21, 2018 at Hampton Middle School, 4589 School Drive, Allison Park, PA 15101. The event is free and open to the community.

“We are pleased to be participating in this regional event for the second year in a row,” said Dr. Michael Loughead, Hampton Township School District Superintendent. “We invite the community to stop in to experience the kinds of innovative, hands-on learning that is occurring in our classrooms daily in the Hampton Township School District.”

The [Remake Learning Network](#), renowned for launching educational innovations now recognized nationally, will host 270 fun and mostly free events from May 17-25 during [Remake Learning Days](#). Parents, families, and kids are invited to experience hands-on, technology-infused, engaging learning experiences in neighborhoods across southwestern Pennsylvania and West Virginia.

This year, Remake Learning Days will be showcased nationally as visitors from across the U.S. attend in anticipation of expanding the event to their own cities next year. These guests will tour designated Remake Learning Days events around the region to gain ideas and best practices they can adapt for their regions.

“We are thrilled that other cities will soon be adopting this creative, hands-on approach for education,” said Dorie Taylor, producer for Remake Learning Days. “Our goal since the inception of Remake Learning Days in 2016 has been to spark a learning revolution for this generation of PreK-12 students, inspiring them as well as the adults in their lives to meet their futures head-on. By connecting them with ideas that tap into their passions, we hope to encourage them to embrace education as a bridge to this future.”

Visitors to Hampton’s Innovate the Future at the Hampton Hub event will have the opportunity to observe students as they demonstrate the transformative learning experiences they have engaged in during the school year. Hampton Middle School also will unveil its new Innovation Studio, made possible through the generosity of the [Hampton Alliance for Educational Excellence](#) (HAAE).

Exhibits planned for the evening include:

- Poff “Eco” Tank
- Coding with Spheros

- Bloxels - learn how to build games and tell stories about anything you can imagine.
- Arts & Bots - Combine craft materials and robotic components to build and animate a unique creation.
- Makey Makey Sculptures
- Flipgrid: Amplifying Student Voice
- Hampton Creates Exhibit and Product Sales
- Odyssey of the Mind - learn more about this organization while solving hands-on, spontaneous problems creatively.
- Common Sense Media - learn about the importance of Digital Citizenship
- Robotics and Computational Thinking - try your hand at computational thinking under the guidance of Robotics students and instructors at HTSD.
- Young Playwrights - participate in this interactive workshop that combines arts and technology to create funny dialogue, strong conflicts and clever plots.
