

Enrichment/Gifted Students

Parents who suspect that their school-age child is gifted may request a Multidisciplinary Evaluation (MDE). Students must meet eligibility requirements to qualify for Chapter 16 services. Specific requirements include being identified with mental giftedness as defined by the Pennsylvania Department of Education and being in need of specially designed instruction. Multiple criteria, including an evaluation by a certified school psychologist, are used to determine gifted identification. If a student qualifies for Chapter 16 services, a Gifted Individualized Education Plan (GIEP) will be developed by the IEP team and individualized annual goals and short term learning objectives will be established.
